

### **I.7.1 Distillate of vitivincultural origin**

Alcoholic liquid is obtained:

- by direct distillation of wine, fortified wine, wine lees, or
- after alcoholic fermentation of grape marcs, raisins or fresh grapes by the distillation of these fermented musts, or
- by re-distillation of the distillate of vitivincultural origin or wine spirits,

The distillate of vitivincultural origin, contrary to neutral alcohol of vitivincultural origin, must have the aroma and taste of the above-mentioned raw materials.
