

### **II.2.1.3.1.2 Microbiological acidification**

**Definition:**

Increase of titratable acidity and real acidity (decrease in pH) by using yeasts.

**Objective:**

a) see general sheet “acidification” (*II.2.1.3.1*)

**Prescriptions:**

In order to achieve this objective, microbiological acidification by yeasts may be carried out by inoculation of selected strains.

**Recommendation of the OIV.:**

See sheet: acidification by yeasts (Saccharomyces and non-Saccharomyces)(*II.2.1.3.1.2.1*)
