

OIV-OENO 661-2021 Collaborative study- Method validation for the determination of free sulphur dioxide, OIV-MA-AS323-04A1 (update). Update to the method validation for the determination of total sulphur dioxide, OIV-MA-AS323-04A2 (update)

THE GENERAL ASSEMBLY,

IN VIEW OF the Article 2, paragraph 2 b) iv of the Agreement of 3rd April 2001 establishing the International Organisation of Vine and Wine,

AT THE PROPOSAL OF the “Methods of Analysis” Sub-Commission,

CONSIDERING the two draft resolutions already adopted in 2018 regarding the update to the method for the determination of sulphur dioxide, distinguishing the Type IV method for the determination of free sulphur dioxide (Resolution OIV-OENO 591A-2018) from the Type II method for the determination of total sulphur dioxide (Resolution OIV-OENO 591B-2018),

CONSIDERING the need for validation of the method for the determination of free sulphur dioxide, OIV-MA-AS323-04A1 (update), and the need for updated validation of the method for the determination of total sulphur dioxide, OIV-MA-AS323-04A2 (update),

DECIDES to complete methods OIV-MA-AS323-04A1 on free sulphur dioxide and OIV-MA-AS323-04A2 on total sulphur dioxide in the Compendium of International Methods of Wine and Must Analysis with the following collaborative study:

Collaborative study

Method validation for the determination of free sulphur dioxide, OIV-MA-AS323-04A1 (update). Update to the method validation for the determination of total sulphur dioxide, OIV-MA-AS323-04A2 (update)

1. Scope of application

An international collaborative study, in accordance with Resolution OIV-OENO 6-2000, for the validation of updates to the methods for the determination of free sulphur dioxide and total sulphur dioxide (OIV-MA-AS323-04A), based on the decision

of the OIV “Methods of Analysis” Sub-Commission, April 2018.

2. Standard references

- Update (draft) to the OIV-MA-AS323-04A methods,
- ISO 5725,
- Resolution OIV-OENO 6-2000.

3. Protocol

A total of 20 samples were prepared using homogeneous volumes of 10 wines from various wine regions in France and Portugal. Each sample was made up twice (the second as a blind duplicate), according to the double-blind principle.

The samples were prepared between 18 and 20 June 2018, then shipped without delay to the participating laboratories.

Sample no.	Blind duplicate no.	Nature of sample
A	1-14	Dry white wine
B	2-16	Dry white wine
C	3-19	Dry rosé wine
D	4-12	Dry rosé wine
E	5-20	Dry red wine
F	6-18	Dry red wine
G	7-11	Dry red wine
H	8-15	White liqueur wine
I	9-17	Red liqueur wine

J	10-13	Red liqueur wine
---	-------	------------------

The analyses were carried out simultaneously by all participating laboratories between 16 and 20 July 2018. Samples were kept in refrigerated cabinets by all laboratories between the date of reception and the date of analysis, according to the protocols sent.

The following laboratories provided their results:

Laboratory	City	Country
Estación de Viticultura e Enología de Galicia	Leiro (Ourense)	Spain
Laboratorio arbitral agroalimentario	Madrid	Spain
ASAE	Lisbon	Portugal
SCL Montpellier	Montpellier Cdex 5	France
HBLA und BA für Wein- und Obstbau	Klosterneuburg	Austria
Laboratorio de Salud Pública	Madrid	Spain
Laboratorio Agroambiental de Zaragoza	Zaragoza	Spain
Laboratoire SCL Bordeaux	Pessac Cedex - CS 98080	France
Unione Italiana Vini Servizi	Verona	Italy
Laboratorio Agroalimentario de Valencia	Burjassot (Valencia)	Spain
Agroscope	Nyon	Switzerland
Laboratoires Dubernet	Montredon des Corbières	France

Laboratoire Dioenos Rhône	Orange	France
Laboratoire Natoli	Saint Clément de Rivière	France

NB: The order of laboratories in the table does not correspond with the order in the following tables, in order to preserve the anonymity of results.
