RESOLUTION OIV-OENO 605-2017

IRON LIMIT IN THE OIV MONOGRAPHS ON PVI/PVP

THE GENERAL ASSEMBLY,

In view of article 2, paragraph 2 iv of the agreement of 3rd April 2001 establishing the International Organisation of Vine and Wine;

CONSIDERING the work of the "Specifications of oenological products" expert group;

CONSIDERING that Iron is a common ingredient/usual accompanying material in production processes via e.g. water and equipment.

CONSIDERING that the content of iron has no influence on the technological properties of the PVI/PVP copolymer.

CONSIDERING that the actual limit of iron content must be less than 1 mg/kg but several trials show that the maximum level is too low;

DECIDE to modify the monograph COEI-1-PVIPVP as follow:

Iron limit in the OIV monographs on PVI/PVP

In the point 5.5 IRON:

The iron content must be less than 5 mg/kg

Certified in conformity Sofia, 2nd June 2017
The Director General of the OIV
Secretary of the General Assembly
Jean-Marie AURAND
