RESOLUTION VITI 3/93

VINE PHYSIOLOGY

THE GENERAL ASSEMBLY,

Based on the proposai of Commission I " Viticulture ", taking into account the results of the IVth Symposium on the Vine that was held in Italy (San Michèle all'Adige and Turin) on May 11-15, 1992,

DECLARES:

- The influences of genetic characteristics, of soils and of man on vine physiology;
- That through physiological modifications, it is possible to control the vigor, production and quality of vine products,

DRAWS the attention of the Member Countries to the need to develop studies

- Aimed at the standardization of méthodologies
- On the relationship between vigor, productivity and quality, taking into account aspects of phys iology, health, molecular biology and viticulture,

WISHES the organization of another Symposium on these same subjects in three years.

Certified in conformity San Francisco, 3th September 1993
